III. Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

# INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.  
PCT/US03/41613

## V. Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

### 1. STATEMENT

Novelty (N)

Claims 1-86, 126-200 YES  
Claims NONE NO

Inventive Step (IS)

Claims 1-86, 126-200 YES  
Claims NONE NO

Industrial Applicability (IA)

Claims 1-86, 126-200 YES  
Claims NONE NO

### 2. CITATIONS AND EXPLANATIONS

Claims 1-86 and 126-200 meet the criteria set out in PCT Article 33(2)-(3), because the prior art does not teach or fairly suggest an association between an expression quantitative trait locus in a second species of organism that colocalizes with a clinical quantitative trait locus in the second species of organism and a homologous gene in a first species such that the homologous gene in a first species is thereby determined to be a clinical quantitative trait locus for the same clinical trait.

Claims 1-86 and 126-200 meet the criteria set out in PCT Article 33(4), and thus have industrial applicability because the subject matter claimed can be made or used in industry.
